

Care Shower

Thermostatically Controlled Shower (model CSABATLF)

The Arrow Valves Care Shower consists of an instantaneous electric shower and Booster Pump package, which supplies hot water to an accurate maximum temperature.

The assembly's integral AB air gap providing **Fluid Category 5 backflow protection** makes it ideal for the highest risk applications such as **healthcare and veterinary**.

This BEAB Care shower meets **BEAB Care Mark requirements** as being safe for use by **elderly, young or sick**.

The shower has an **extra long hose**, which is allowable due to the backflow protection should the hose become submerged in bath or toilet water.

- **Fluid Category 5 backflow protection**
- **Automatically controlled Booster Pump**
- **Long 2 m hose** - ideal for bath use
- **Thermostatic and electronically flow controlled**
- **Three flow settings @ consistent temperature**

This high specification shower provides accuracy to $\pm 1^{\circ}\text{C}$, with a maximum temperature setting between 37 - 48°C. The shower should be restricted on site to a maximum of 41°C in-line with DO8 recommendations.

The phased shutdown feature **minimises risk of scalding** whilst purging the hot water to avoid scale.

The integral **booster pump** ensures a **generous flow** even when used in low supply pressure areas - minimum supply only 0.8 bar.

Applications -

- Healthcare - assisted bathing • Nursing homes • Veterinary
- Dog Grooming • Medical • Mortuary • Butchery • Bidet
- Toilet (paperless)
